Jatin Karnwal

Future Operating Model

Designed in consultation with the client, the proposed model for our next project will enable value delivery with velocity. This is in line with our learnings from the assignment and industry best practice.

Future Implementation Methodology

Sticking more closely to the industry standard agile model for our next project will reduce delivery risk and increase delivery speed to deliver value more quickly and effectively

Research

Gather experience input through video or phone interviews with and examine available data

(Virtual) workshops

 Capture requirements, document process design and the desired Service experience

Personas

Create a set of employee profiles to represent user needs, motivations and current pain points

01 -Initiate

02 - Examine

Process Recommendation
